

On Thursday 3rd July, members of our Code Breaking Club had an amazing opportunity to take part in the "*Number Patterns: The Bunker*" workshop delivered by AS Creatives.

This code-breaking adventure challenged pupils to work collaboratively to uncover secret messages and hidden locations in a thrilling, story-driven scenario. They tackled challenges involving rebuses, Caesar shifts, substitution cyphers and other cipher combinations—exploring maths and problem-solving in a fun and memorable way. This hands-on approach made for a fantastic day of learning, teamwork, and collaboration.
