

Since October, our after-school STEM club have been building a kart to race in the STEM On Track programme.

On Monday 26<sup>th</sup> of January, members of our STEM On Track visited our STEM club during our kart construction session. We were also fortunate to have 2 members of the Alpine F1 team visit to see how well STEM On Track worked in our school.

During the visit, the team also filmed a promotional video for the programme, which our STEM pupils were all a part of.
