

On Tuesday 18th November, some of our Sustainability club pupils worked with visitors from the RHS Hyde hall to complete a habitat mapping activity for Woodlands School.

Pupils worked together to investigate the habitats on our school grounds and then we uploaded our findings to the National Education Nature parks website so that our data can contribute to wider research.

Our budding horticulturalists also had the opportunity to do some hands-on learning with a bulb planting activity in our wellbeing garden. Pupils learnt from the RHS experts about bulb layering for the best results and gained some planting tips and knowledge.

We are all looking forward to the tulips and daffodils sprouting and blooming in the garden next spring.
