

On the 13th of November 30 students from years 7-8 APT attended a trip to the High House Production Park in Purfleet.

High House Production Park is a facility run by the Royal Opera House and creates the sets for forthcoming shows and also stores their costumes from previous productions.

Students were given a tour of the facilities to see all of the hard work and focus it takes to build and design world renowned set pieces.

The students then were given a masterclass workshop on costume design and each students created an amazing design.

We want to thank High House Production Park and the Royal Opera House for their amazing support, it really inspired the students to aspire to a career within the creative arts.
