

On Wednesday 10<sup>th</sup> June a group of sustainability club students visited Hyde Hall with Mrs Fry and Mr Gray. Pupils explored the biodiversity of their beautiful 300-acre garden with a guided tour, learning as they went about how much goes into its upkeep and what jobs this creates.

Students were there to find out about green career opportunities at Hyde hall and similar establishments.

Pupils were taught about the huge conservation efforts happening at Hyde Hall. They were also treated to a session on recognising different herbs and seeds and were allowed to plant some seeds and take some herb cuttings.

Our session was led by the wonderful RHS Staff Rachel and Krysinta who were very enthusiastic and extremely knowledgeable who made the day special.

In the final part of the session, pupils explored the diverse career paths taken by RHS staff that led them to roles at Hyde Hall. They then reflected on their own strengths, interests, and challenges to consider which future careers might be the best fit for them.

A really valuable visit for all.
