

On Monday 15th December, 33 Triple Science students visited Anglia Ruskin University with Mrs Glover, Mr Masters and Mr Williams. Students took part in the Animal Encounters lecture run by the Science and Engineering faculty. They were treated to a presentation by Grace, a wildlife presenter who has trained animals for films and commercials. She brought her rats and an owl to the lecture and we were treated to a display by the animals. The owl flew over the student's head! The students all enjoyed learning about the animals and were a credit to the school.
