

On Friday 14th March, 8 of our Year 10 mathematicians took part in the Maths Feast Competition at James Hornsby School.

Each round was designed to test mathematical problem solving and knowledge.

Our Pupils particularly enjoyed a 'broken calculator round' in which you had to work out which button on the calculator was broken from some questions and answers.

They stood out for their ability to work together and for treating each other with kindness and respect throughout the competition.

The organisers also spoke to the pupils about potential careers involving mathematics and various options for post-16 study.

Well done to all the pupils who represented Woodlands School.
